

ABSTRACT OF THE DISCLOSURE

A hanger for hanging bags wherein a card body (2) cooperates with a holding strip (11) that is connected to the card body by a film hinge (10) to define a gap between the card body and the holding strip. A means for latching the holding strip (11) to the card body (2) includes a first mechanism (9) for latching the holding strip to a fastening surface (7) of the card body (2) or a second mechanism for latching the holding strip to a side edge (14) of the card body (2).
